

COMMUNITY INVOLVEMENT IN DECISION MAKING

The Committee believes that community participation in the schools is essential to maintain mutual confidence and respect and to improve the quality of education for all students.

Community participation is important both at the Committee and school levels. The Committee shall seek to involve the community through established policies governing public participation at Committee meetings, advisory committees and other appropriate means. The Building administrator is encouraged to establish methods to involve the community in decision-making processes which are consistent with Committee policies.

The Committee is ultimately responsible for the formulation of policies involving the curriculum instruction and the overall school program. The Committee reserves the right to make the final decision regarding any such policies, while taking into account the views and suggestions from community members and others.
